## THREADLOCKING

**106 low strength threadlocker**  
Low strength grade where easy dismantling is required.

**120 medium strength threadlocker**  
Medium strength grade, oil tolerant product. Ideal general purpose treadlocker.

**110 Penetrating threadlocker**  
Very low viscosity, medium strength threadlocker that wicks into tightened threads. It can also seal small gaps and cracks up to 0.15 mm.

**126 High strength threadlocker**  
High strength grade for heavy duty applications where full strength is required, but not disassembly.

*Available in 10ml and 50ml bottle.*

10ml bottles	£3.90
50ml bottles	£9.90

## HOLDING & SEALING - RETAINING

**211 Bearing retainer**  
Medium strength grade for retaining all types of cylindrical parts on shafts and in housings etc.

**227 High temperature retainer**  
Ideal for bonding components when temperature resistance up to 230°C is required.

**220 Multi-purpose retainer**  
Good shear strength grade for retaining slip fitted parts and increasing the strength of press fitted part.

**231 High strength retainer**  
Very high shear strength grade for the permanent retention of slip press fitted components, including bushings and sleeves.

*Available in 10ml and 50ml bottle.*

10ml bottles	£3.90
50ml bottles	£9.90

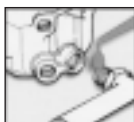

## SEALING & GASKETING

**311 Pipe sealant**  
Medium strength grade for instant low pressure seals coarse threads. Replaces tapes, pastes and hemp. Thixotropic.

**408 Liquid gasket**  
General purpose flange sealant that forms any size or shape of gasket. Impervious to petrol or diesel. Makes instant, low pressure seals and fills gouges up to 0.5mm.

**315 Hydraulic Pipe sealant**  
For high pressure sealing of all hydraulic and pneumatic connections up to 20mm diameter and small pipe threads. Instant, low pressure seal.

10ml tube	£3.90
50ml tube	£9.90
